

## Angles

### Fill in the blanks

- 1) The measure of one complete angle is equal to four \_\_\_\_\_ angles.
- 2) An angle of  $180^\circ$  measure is called \_\_\_\_\_.
- 3) The common initial point of two rays is called as \_\_\_\_\_.
- 4) An angle whose measure is greater than that of the right angle but less than  $180^\circ$  is \_\_\_\_\_.
- 5) The two intersecting rays at a point form an angle, the two rays are called as \_\_\_\_\_ of the angle.
- 6) The measure of 2 right angles is \_\_\_\_\_.
- 7) The sum of two angles is  $90^\circ$ , then each of them is \_\_\_\_\_ angle.
- 8) At 7 o'clock, the angle formed between minute hand and hour hand is a \_\_\_\_\_ angle.
- 9) At 12 o'clock, the angle formed between minute hand and hour hand is \_\_\_\_\_.
- 10)  $\frac{1}{2}$  of straight angle is equal to \_\_\_\_\_.
